

Savagnin Les Molates 2023

This assemblage comes from several plots around the town of Sainte-Agnès. The vines average 25-years-old and are planted on limestone over marl. The grapes are pressed directly to barrel for fermentation and malolactic conversion. No bâtonnage is done during élevage, and the barrels are kept fully topped to prevent oxidation. The wine is bottled unfined and unfiltered with minimal SO2 after 10 months.
